# Full HD camera with integrated pan-tilt for lectures, meetings and a wide variety of applications.

The AW-HE40 series of integrated full HD cameras performs in a wide variety of onsite shooting applications that require high-quality video, such as conferences, lecture capture and other events, thanks to its high-performance zoom, wide angle of view and outstanding color reproducibility. In addition to IP video transmission, support for PoE+\*1 enables power to be supplied via a LAN cable\*2. The result is installation flexibility. It also supports HD-IP video output, output of video and audio via USB, and SD card recording.

## Developed 1/2.3-type MOS Sensor

Equipped with a developed 1/2.3-type MOS sensor and DSP (Digital Signal Processor) for high sensitivity and high resolution.

## High Performance Optical 30x Zoom Lens/ Super Resolution 40x Zoom

In addition to a 30x optical zoom, the AW-HE40 series can zoom up to 40x while maintaining high resolution thanks to Super Resolution technology. It also features a 16x digital zoom\*3 and a 1.4x digital extender, which enables the AW-HE40 series to shoot in large conference halls and classrooms.

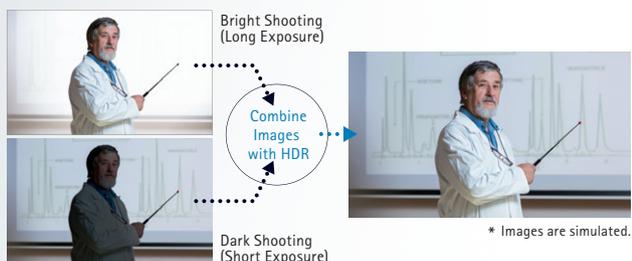

## Night Mode (supports automatic switching)

Switching to Night Mode makes shooting possible even in low light conditions in which shooting is normally difficult, such as when observing wildlife\*4. The AW-HE40 series can also be set to switch to the mode automatically depending on surrounding light levels.

## Equipped with High Dynamic Range (HDR) Mode

In addition to conventional Dynamic Range Stretch (DRS) and Digital Noise Reduction (DNR), the AW-HE40 series are newly equipped with High Dynamic Range (HDR) mode. When shooting and synthesizing two images with differing exposure times, the AW-HE40 series can create video with high visibility that corrects for halation and black defects even under backlit conditions.

## Outputs Still Image During Preset Movements; Supports One-Camera Operations

The new Freeze During Preset function enabled to freeze the video during preset playback. The immediately preceding still image is output during preset movements so that the swiveling movement is not displayed, making operations possible with one camera.

### With Freeze During Preset function OFF and ON

## Either SDI Model or HDMI Model Can Be Selected To Match Usage Needs

Supports 1080/59.94p (HDMI model only), 29.97p\*5, 59.94i, 29.97PsF, 1080/50p (HDMI model only), 25p\*5, 50i, 25PsF, 720/59.94p, and 50p video formats. Flexible operation in line with the application is made possible by a lineup that includes an SDI output model (AW-HE40SW/SK), optimal for video content production, and an HDMI output model (AW-HE40HW/HK), optimal for video streaming, both of which come in two body colors (white and black) that can be selected depending on the usage environment.

## Video/Audio Output with USB

USB Video Class and USB Audio Class are supported. This enables video and audio output via USB so the cameras can be used as high-image-quality Web cameras for Web conferencing, distance learning, and other applications utilizing communication software.

## Audio Input Function

The AW-HE40 series also supports audio input, embedding and encoding. Audio output to IP is also supported. The ALC (Audio Automatic Level Control) in the original AW-HE40 series can be switched ON/OFF and an equalizer function can be used. By reducing low-frequency sound from air conditioners, projectors, and other devices, it is possible to emphasize and increase the clarity of the spoken words.

\* 1: Abbreviation of Power over Ethernet Plus. \* 2: The software for the AW-HE40 series may need to be updated depending on the existing software version. For details, see the Panasonic website (<http://pro-av.panasonic.net/>). \* 3: Picture quality is lower with the digital zoom. \* 4: Video output is monochrome. \* 5: Native output.

## microSD Card Recording Function

MicroSD card recording is supported. Camera video and audio can be recorded in MP4 format on microSD card (sold separately) inserted into the unit. In addition, using an IP network, it is possible to externally control recording start/stop and download the recorded files.

## Full HD Video Output Via IP Transmission

In addition to HD-SDI and HDMI output, production quality full HD video output via IP transmission is supported. The camera delivers up to four channels of IP streaming video (H.264), with a maximum quality level of 1080/60p at 24 Mbps\*1. Simultaneous transmission to as many as 14 devices is also supported\*2. Flexible system setup is possible to meet various application needs.

### List of Supported Multi-Streaming Outputs (When IP output priority is selected\*)

Settings	H.264				JPEG

\* Depending on the output mode, certain restrictions apply.

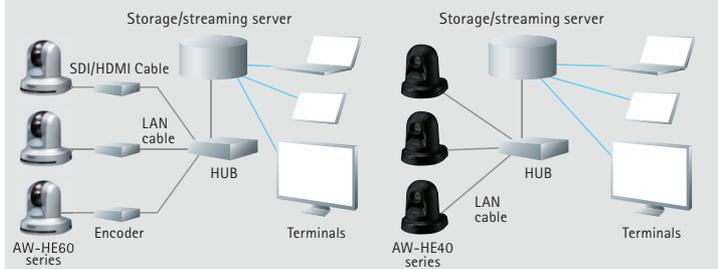

## Transmit IP Video Without a Separate Encoder Reduces Cost and Simplifies Installation

There is no need for the separate encoder normally required when streaming video and audio via IP. Systems can be built with exceptional cost/performance benefits.

### Lecture Capture/Streaming System Example

● When used with cameras with only SDI/HDMI output

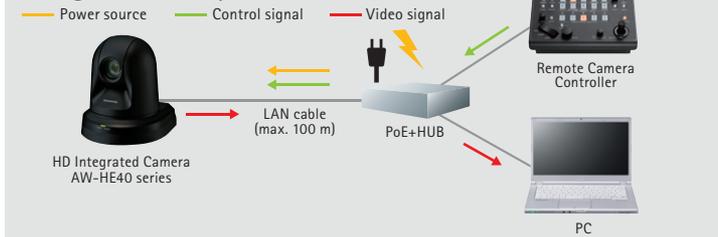

● When used with cameras capable of IP video output

## Supporting PoE+\*6 for Lower Installation Costs

By connecting network devices that support the IEEE802.3at PoE+ standard, power can be supplied via LAN cable. Since it is not necessary to install a power supply or even a local AC outlet, installation costs can be significantly reduced.

### Configuration Example

## IP Control with Image Monitoring Using PC, Mac and Mobile Terminals

Using an IP browser, the camera can be controlled from a remote location, and IP video monitoring and remote camera control can be performed from a PC, Mac or mobile terminal such as an iPhone, iPad or Android device, enabling easy operations. IP video\*7 can be transmitted to up to 14 terminals\*1.

\*For the latest information on supported OS/browsers, please refer to the "service and support" section on the Panasonic website (<http://pro-av.panasonic.net/en/>).

### Camera Control Screen (PC)

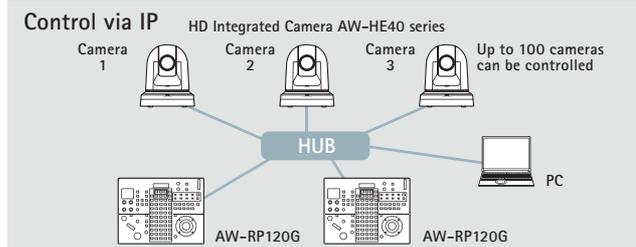

Live Screen

### Mobile Terminal Screen

## Flexible IP Control Architecture Simplifies System Design and Operation\*8

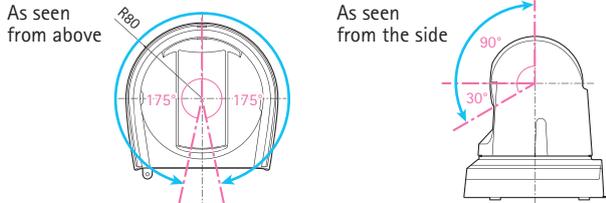

Up to 100 x AW-HE40 series cameras can be controlled via IP from a single AW-RP120G/RP50 or PC. An AW-HE40 series can also be simultaneously controlled by up to five AW-RP120G/RP50's via IP.

\*1: 1920 x 1080 60 fps output is 1ch display only. For 2ch or more, display is max. 30 fps. Also, JPEG output is up to 3ch. \*2: Depends on your network environment. \*3: Settable when HDR is "Off". \*4: Settable when HDR is set to "Off" and the frame rate is other than 60fps (or 50fps). \*5: Not settable when HDR is "Off". \*6: Abbreviation of Power over Ethernet Plus. \*7: Supports only SD video output. \*8: Controller upgrade required. For details, please refer to the "service and support" section on the Panasonic website (<http://pro-av.panasonic.net>).

## Exceptional Pan-tilt Performance for Smooth Shooting Over a Wide Area\*1

The pan range of  $\pm 175^\circ$  and the tilt range of  $-30^\circ$  to  $+90^\circ$  cover a wide shooting area\*1. Pan and tilt operate at a maximum speed of  $90^\circ/\text{second}$  and respond quickly to remote control operation. They operate quietly at a sound level of NC35 or lower.

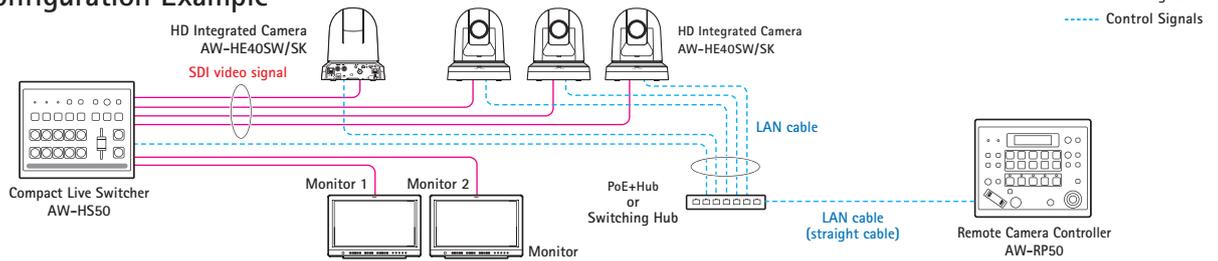

\*1. Depending on the position of the pan and tilt, the unit itself may be reflected in the image.

## Other Functions

- Preset memory up to 100 positions.
- Functions such as freeze during preset, digital extender zoom and color temperature settings can be assigned to the user buttons on Panasonic controllers.
- Equipped with RS422 remote terminal; up to five units can be controlled via serial control from a controller.
- Equipped with RS232C remote terminal (standard serial communication support). Up to seven units can be controlled via daisy chain connection.
- Up to four units can be operated with a wireless remote controller (AW-RM50G sold separately).
- Easy installation thanks to use of turn-lock mechanism.

## System Configuration Example

\*The AC adaptor provided with the unit is not shown in the above figure. \*SDI output supported only by AW-HE40SW/SK.  
\*The camera unit automatically recognizes straight cables and cross cables connected to the LAN terminal.

## Supporting Lecture Capture with Auto Tracking function

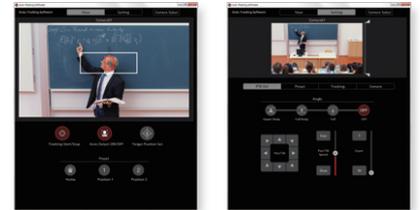

Auto Tracking Software Key  
AW-SF100G

### (Main Features)

- "Motion detection" system using video streaming from camera achieves smooth auto tracking regardless of where the person facing
- A GUI screen designed for intuitive setup
- Using IP-based software to support installation/operation of camera in classroom in remote location.
- Selectable as a Web application for flexible installation and operation that also enables control from a tablet, smartphone, desktop PC, etc.
- When it is installed on a PC, it can be easily set up by connecting AW-HE40 series. Installation of sensors and other devices are not necessary.

\*This refers to the standalone version. In case the Web application version is used, the Auto Tracking Software is installed on an HTTP server and used from there.

Settings-PTZ Ctrl Screen

\*Depending on the usage conditions, there may be errors in detection of tracking subjects or proper tracking. Please use this software in an environment in which corrections can be made by an operator.

\*There is a 30-day free trial available for Auto Tracking Software. Please purchase this "Auto Tracking Software Activation Key" after checking precautions and confirming that this will work in your environment during this free trial period. When purchasing optional software please refer to the Panasonic website <<http://pro-av.panasonic.net/>>" Software Download".

## Easy Wireless Control Using an iPad\*3 with a Control Assist Camera\*4.

Control Assist Camera  
AW-HEA10W

Control Assist Camera  
AW-HEA10K

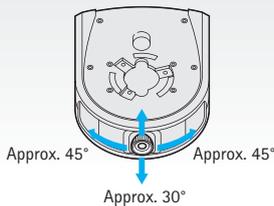

- Used in combination with an 4K/HD Integrated Camera\*4.
- $95^\circ$  wide-angle view from the Control Assist Camera is displayed on an iPad.
- Tapping the desired area of the wide-angle view displayed on the iPad\*3 turns the field of view of the 4K/HD Integrated Camera\*4 to the tapped position.
- 4K/HD Integrated Camera\*4 pan, tilt, and zoom can be easily controlled from an iPad.
- Up to 9 preset positions can be registered.

\*3: An iPad (sold separately) and a wireless AP (sold separately) are required. Please install the iPad application "PTZ Cntrl" (free). For details, please visit Panasonic AW-HEA10W/K website ([http://pro-av.panasonic.net/en/sales\\_o/camera/aw-hea10/](http://pro-av.panasonic.net/en/sales_o/camera/aw-hea10/)).

\*4: AW-UE70W/K, AW-HE130W/K, AW-HE40 series, and AW-HE60 series only. When used with the AW-HE60 series, in some cases an AW-HE60 series software upgrade will be necessary.

### Range of lens movement

This is adjustable  $30^\circ$  vertically and  $45^\circ$  horizontally.
